DETAILED ACTION

Applicants' amendment filed 12/11/2003 has been entered. All pending claims have been carefully reconsidered in view of the amendment, however they are still unpatentable. In view of the amended limitations, a new ground of rejection is provided in this office action.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1,2,3,4,5,6-7,8,9,10,11,12,13 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,2,3,4,8,10,11,12,13,14,15,16 (respectively) of U.S. Patent No. 6,529,656 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other.

'656 patent claims an optical device with all the limitations claimed in the instant application, except it does not explicitly claim that downstream and upstream signals

Art Unit: 2874

are not overlapped. However, downstream and upstream signals being allocated in different wavelength bands is well known in the prior art as discussed in the applicants own disclosure (Fig. 1, page 2 lines 6-18). Downstream and Upstream groups of WDM signals whose wavelength bands are split according to their propagating direction are advantageous and desirable because they allow for reduced intensity noise and cross-talk among transmitted optical channels. Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify '656 patent to claim downstream and upstream signals whose wavelength bands are split.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
